

## **Fall 2013 Teaching Music with Technology**

Our fall 2013 workshop was “Tapping into Technology!” The workshop was held at the Koehneke Community Center, at Concordia University Chicago. We had attendees who included faculty, teachers, students, therapists, music and movement specialists.

The workshop began with chapter president, Dr. Rekha S. Rajan, challenging attendees to think about the advantages and disadvantages of using technology with young children. This brief presentation was followed by Dr. Kristin Lems’ session on simple ways to combine technology and music. Dr. Lems also engaged the attendees in a group dance of YESH! and suggested additional ways of integrating music, literacy skills, and technology. Our final session was presented by Ms. Brigid Finucane, who was presenting with us for the third time! She shared numerous ideas for using the latest applications (apps) in the music classroom. Some of her ideas included apps for teaching notation, pitch, sequencing, and composition.

Brigid demonstrates beat and rhythm on her iPad

Dr. Lems discusses multi-cultural music.

More than 30 early childhood educators in attendance.

*Please join us for our Spring Workshop!  
Saturday May 3, 2014  
10:00am-12:30pm*

*Movement through Words:  
Connections between Dance and Literacy  
Concordia University Chicago  
Christopher Center, Room 251*
